Dear Department of Justice,

I use Microsoft Windows and do not feel harmed by the so-called "Monopoly "....If you think about it, there has to be a "monopoly" so that computers can talk to each other.

Janet Reno started this lawsuit for political reasons. I hope that you will end it now.

Also, I think that it is wrong that the various States are getting on the bandwagon now to bleed Microsoft for the benefit of politicians and lawyers.

Also, this lawsuit was for the benefit of Sun Microsystems and other big companies who donated money to the Clinton administration.

This is a free country...you should not try to destroy American Business.

If you must do something in the Cartel area, why don't you try going after OPEC and their subsidiaries in the country who are selling gasoline.
